# RIDING GEAR

“Your riding gear shouldn’t slow you down when getting on the water. Riding gear that’s easy to get into and out of makes the day on the water more fun.”

— Matt Ritter

## THE FUN LASTS LONGER WHEN SAFETY IS IN THE DRIVER’S SEAT.

When you’re the driver of a personal watercraft, you need to take the safety of your passengers personally.

As the “captain,” you are not only responsible for adhering to the safety rules respecting personal watercraft use, but also for ensuring your passengers are wearing the appropriate protective equipment and riding gear.

First of all, you and your passengers are required to wear an approved personal flotation device (PFD) certified for use with a personal watercraft.

Also, a wetsuit and/or neoprene bottoms will provide adequate protection to the lower part of the body. You can suffer severe internal injuries if water is forced into a lower body cavity as a result of falling in the water or being near the jet thrust nozzle. Remember that normal swimwear cannot appropriately protect against forceful water entry.

Finally, extra protective equipment such as footwear, gloves and goggles is also recommended. The fun lasts longer when safety is in the driver’s seat.

You can find all of these items at an authorized Sea-Doo dealer.
